# WPC LAMINATE DOORS

WPC laminate doors blend wood fibers and plastic polymers to emulate wood's look with enhanced durability. A surface layer of synthetic laminate imitates diverse textures and patterns like wood grain and stone. These doors boast resistance to moisture, insects, and rot, requiring minimal maintenance compared to wood. They offer versatile design options, suiting various interior and exterior styles, while being cost-effective and potentially eco-friendly due to recycled content. Ideal for entrance, interior, and patio doors, WPC laminate doors harmonize aesthetics and practicality indoors and outdoors.

## Door option : WPC DOOR

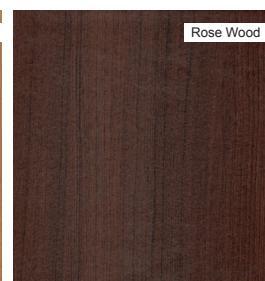

**Density :** 550kg/cum

**Thickness :** 24, 28, 30mm

**Laminate :** 1mm / 0.8mm HPL / PVC foil on both sides
